GWP-TW7 12-Axis fully automatic winding package one machine

SPECIFICATION:

Number of Spindles	12
Spindle pitch	65mm
Spindle max revolutions	9000rpm
Spindle power	1500w
Control system	8-axis control system
HMI	7 inch touch screen
Fixture interface	8
Wire diameter	0.08-0.5mm

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area,Dongli Distr,Tianjin,China.

XYZV axis travel distance	X:180 Y:190 Z:120 V:90
Tape width	4-25mm(optional)
Power specification	AC220V±10% 50HZ
Total power	3300 (3500w)
Air supply requirements	0.45-0.75
Dimension	1300*1300*1650mm
Weight	480kg

MACHINE FEATURES:

The core standard parts of the machine are all imported from Japan which ensures the machine's high precision, high speed and stable production of automatic feeding and unloading mechanism, greatly improving the production efficiency. The output of about 2000 to 3000 terminals per hour is arranged and wound in vertical and horizontal directions arbitrarily; the nozzle can be set at 0, 45, 90 or more angles, and can complete multiple angle winding at one time. The use of precision tension controller provides accurate and stable tension control, so that the product in the winding process is more perfect.

It adopts the control system independently developed by Grewin Technology, with multi-axis linkage and output and input synchronization functions, fast and accurate winding positioning, and easy modification of various auxiliary cylinder actions. It has a password storage function for display functions such as single use time, output, winding speed, etc. to prevent non-related personnel from modifying the program.

PRACTICAL APPLICATION :

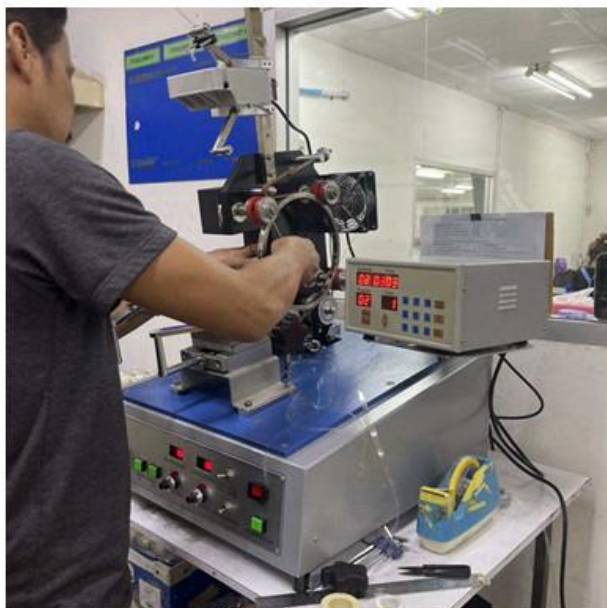

TRAINING CUSTOMER TO OPERATE WINDING MACHINE :

1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.

2.Guide the user to use accurately and how to maintain the Hook Type Transformer Winding Machine.

Provide free consultation about production process technology of electronic products.

3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1.General package(Paper carton or plastic bag): For small equipped parts for Hook Type Transformer Winding

Machine, Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Hook Type Transformer Winding

Machine,we have special skilled

carpenter, who would make the proper wooden case with exact thickness,density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.
